SCF partners with Safe Haven Solutions and Producers Market to develop AgriHaven agricultural parks globally

Glasgow, Scotland UK, November 19 2021:

As part of the ‘Carbon Negative Food Systems Hold the Key to a Sustainable Planet’ COP26 sideline event, the global Subnational Climate Finance (SCF) initiative has entered into an exclusive partnership with agricultural park developer, Safe Haven Solutions, and Producers Market in efforts to finance the construction of scaled agricultural parks in Jamaica and beyond.

SCF’s partnership with Safe Haven Solutions and Producers Market to create the AgriHaven venture, aims to construct industrial parks utilizing cutting-edge, carbon-negative agricultural techniques, combined with regenerative agriculture and farming digitization, with the goal of climate change mitigation and adaptation. The initial focus is to develop the AgriHaven model in island nations, such as Jamaica and the Bahamas, which are currently working to establish food import independence and experiencing the impacts of climate change more acutely.

Jamaica will be one of the two pioneering countries for the AgriHaven implementation, and has received direct endorsement from the Honorable Prime Minister of Jamaica, Andrew Holness. Jamaica has signed a Letter of Intent with AgriHaven to implement the initial eco-industrial and agroforestry development on approximately 300 acres of land in St. Thomas, Jamaica. The project is being supported by JamPro and the Honorable Minister of Agriculture and Investment, Audley Shaw.

The Jamaica AgriHaven project includes a direct partnership outreach to existing small farmers in order to provide regenerative agriculture training, digital technology training, organic input supplies, and the aggregation and direct sales of outputs to the AgriHaven for added-value processing and packing for domestic and regional markets.

AgriHaven will look to scale to other countries in the Caribbean and Africa following the financing of the initial two projects.

About SCF

The Subnational Climate Fund is a blended finance fund formed to mitigate climate change and strengthen community resilience projects. The Green Climate Fund (GCF) has closed on an anchor commitment of up to \$150 million, which is intended to mitigate risk to private investors at the fund level. The fund seeks to scale an untapped market for mid-scale climate resilient and low carbon infrastructure, regenerative agriculture and nature-based solutions in developing countries.
